Profile

I am a quick learner with a knack for problem-solving, continuously seeking to expand my knowledge and stay updated with the latest web development trends and technologies. Throughout my education, I have worked on various projects, honing my skills in front-end and back-end development.

Experience

Jr. Software Engineer | Easeteq Software Solutions | October 2024 – Present

Developed custom SharePoint web parts using the PnP Framework and Microsoft Graph API to enhance functionality and user experience. Utilized PnP PowerShell for efficient site provisioning, metadata updates, and automated governance. Applied CSOM for advanced SharePoint operations, including custom workflows and data integration. Created site pages and managed data in Funnel Cockpit. Additionally, worked on WordPress to design and manage websites, ensuring responsive layouts and optimized performance.

Intern | Easeteq Software Solutions | January2024 – April 2024

Developed a PowerApps-based system for efficient asset tracking and management, incorporating features for allocation, maintenance, and inventory updates. Created a leave management solution using SPFx, facilitating streamlined leave requests and approvals. Automated workflows with Power Automate, optimizing the approval process and enabling automated email notifications for timely communication.

Projects

Aero-connect

Developed a dynamic and user-friendly web platform using the MERN stack MongoDB, Express.js, React.js, Node.js) to cater to the needs of aeronautical students and professionals. The website provides access to curated field-specific resources, including courses, industry news, internship opportunities, upcoming events, and conferences. Key features include personalized content delivery, an intuitive interface, and seamless navigation, ensuring an enhanced user experience for academic and professional growth in the aeronautics domain.

Prakarsh'23

Collaborated on the development of the front-end for the Prakarsh project using ReactJS, focusing on creating an intuitive and responsive user interface. Worked closely with team members to configure application routes and define the overall project workflow. Contributed to optimizing user experience and ensuring seamless navigation across the platform.

Education

BE In Information Technology | June 2024 | SVIT, Vasad | 7.68 CGPA

Skills

Web Technologies: HTML, CSS, JavaScript, React, SharePoint, Node.js
Programming Languages: C, C++, C#, Java
Database: MySQL
Version Control: Git**,** GitHub
Microsoft Power Platform: Power Apps, Power Automate
